## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not at all apparent as to how a metal coated material is added to the insulation material without increasing the weight, thickness or density of the materials. Inherently if you add a component to a material at least its weight would increase. Additionally, it is not clear as to how the components are formed together to complete the insulation material.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3765

4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claims 1 and 11, the recitation "adding to said materials an amount effective for the purpose , of a metal coated material" has no clear and definite meaning.

Re claim 4, the recitation "single-layer or multiple layers" is an indefinite alternative recitation.

Re claim 5, the recitation "the surface of the middle" is indefinite as it lacks clear antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 4-6 and 9-14 insofar as definite are rejected under 35 U.S.C. 102(b) as being anticipated by Clough et al. (3646749).

Clough et al. (3646749) teaches the invention as claimed including a metallized woven fabric of a single layer construction with metal coated material applied to its surface.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2, 3, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clough et al. (3646749).

Clough et al. (3646749) teaches the invention as claimed except for the specific material as set forth in claims 2, 3, 7 and 8. It would have been obvious at the time the invention was made to one of ordinary skill in the art to which the invention pertains to provide the specific material of fiberglass, ceramic, etc. since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
